introduction

This volume contains the cumulative indexes for all five issues/numbers of *sociological abstracts* (SA) Volume 28, 1980. Each issue/number of SA consists of a body of abstracts of articles/papers published in the serial literature, and classified into 63 narrow and 30 broad subject matter areas meaningful to sociologists and other social scientists.

Each issue/number begins with a Table of Contents (classification areas). At the end of the classified abstracts section of each SA issue, there appears a detailed and complete subject index, a listing of all authors in an author index, and a source index listing the journals which were abstracted with a bibliographic entry for each item. Thereafter the *Supplements* are bound in sequence of their appearance. First, come the *Supplements* that contain abstracts of association conference papers (such *Supplements* are numbered sequentially, and during the 1980 year, *Supplements* 99 - 107 were published). Next in order comes the *Supplement* that is regularly bound into each SA issue, the *International Review of Publications in Sociology* (IRPS) - new series - which contains, in alphabetical order, all book reviews from the serials abstracted. Each IRPS *Supplement* contains a source index (showing where the reviews originally appeared) and a reviewer index; an authors-of-the-books reviewed index is not provided since the reviews are printed in alphabetical order by author of the book.

The last yearly issue of SA, the No. 5 issue, contains a separate, annual section numbered 9000 which has been added to facilitate the publication of abstracts of conference papers presented at various association meetings which, for one reason or another, reached our editorial office too late for inclusion into the appropriate *Supplement*.

Each document (article/paper, conference paper, book review) SA receives and lists is given an accession number; an identifying characteristic is included in the number so that, once the characteristic of an accession number is noted, one can infer with certainty whether the document is (a) an article/paper published in the serial literature, (b) a paper presented orally at a conference of sociologists, or (c) a book review entry.

The types of documents SA abstracted and the accession numbers they received in 1980, Volume 28, are as follows:

(a) The Serial Literature

There are 7,410 abstracts from the published serial literature with each document/article receiving a four-digit number with an upper case alpha prefix. Volume 2 of SA began with 0001. The current Volume 28 contains the accession numbers listed here.

SA Issue Number	Accession Numbers
28/1	K4007 - K5274
28/2	K5275 - K6938
28/3	K6939 - K8404
28/4	K8405 - K9833
28/5	K9834 - L1417

(b) Association Conference/Papers

There are 990 abstracts of papers published in *Supplements* Nos 99-107. Such abstracts have been assigned five-digit numbers prefixed with an upper case S. The first time such an accession number was used was S00001 in *Supplement* No 30, February 1973.

Section 9000 began appearing in each issue effective with Volume 25, No 2, 1977. Beginning with the current Volume the section is published annually in the No 5 issue.

Supplement No	Accession Numbers
99	S11663 - S11730
100	S11731 - S11876
101	S11877 - S11966
102	S11967 - S12062
103+104	S12063 - S12271
105	S12172 - S12301
106	S12302 - S12399
107	S12340 - S12414
Section 9000	S12415 - S12652

(c) Book Review Bibliography

Effective with the Volume 28, No 1 issue, reviews from all core sociology serials were published. Their accession numbers are listed here. For non-core journals, only those reviews are listed which represent books written by sociologists, or which fall within a sociological area of interest. The accession number contains five-digits, prefixed by a lower case "a." 5,725 book reviews were listed during the current Volume.

IRPS new series	Accession Numbers
No 1	a00001 - a00663
No 2	a00664 - a01754
No 3	a01753 - a03286
No 4	a03287 - a04336
No 5	a04337 - a05725

The cumulative indexes are printed in the following sequence:

Subject Index	pages 1583 - 1931
Author Index	1932 - 1969
Source Index	1970 - 2046
Index of Authors of Books Reviewed	2047 - 1062

A word of explanation on each of the indexes is in order to simplify their use in locating the desired information.

CUMULATIVE SUBJECT INDEX

The CSI contains all subject entries from abstracts of the articles/papers published in the literature as well as those from association/conference/ papers. The distinguishing characteristic is the accession number: if it is a four-digit number with a letter prefix K or L, the subject entry derives from an article/paper published in a journal; and, if it is a five-digit number prefixed with an upper case S, it is a subject entry from a paper presented orally at an association/conference meeting.

CUMULATIVE AUTHOR INDEX

This index contains three types of authors: authors whose articles are abstracted from the serial literature (letter prefix K or L followed by a four - digit number), authors who read papers at an association/conference meeting (letter prefix S followed by a five-digit number) or authors of book reviews (letter prefix a lower case a followed by a five-digit number).

Some authors desire to further disseminate their writings and have offered them on fiche or through our **Reproduction Service**. Authors whose documents are available on fiche are starred; those whose documents are available through xerography are identified with a black dot. For information on our **Reproduction Service** please see page 2046 in this volume or our announcements in any recent issue of SA.

CUMULATIVE SOURCE INDEX

This is a listing of all serial titles, with their addresses, that SA inc. has been receiving over the years to screen for pertinent articles. This is not a definitive list, since serials are born and die yearly and often considerable time elapses before cessation information becomes available. Journals also change names, publishers, and editors. SA inc. does not record changes of editors in this index, but whenever the information is available we record changes of titles (or the availability of equivalent titles in other than English language) as well as the dates that such changes occured. We also include the volume number and year of expiration of the journal. SA carries the names of such expired serials for at least a five year interval.

The abstracts and book reviews published from a given serial are listed immediately under the title and address of the serial, in sequential page order, with a complete bibliographic entry. The last number represents the SA accession number (either the letter K or L and a four-digit number, or the letter a with a five-digit number - the former representing articles, the latter book reviews).

In addition, the *Supplements* published for sociology associations can be found in the proper alpha order by name of the association with all the accession numbers (with letter S and a five-digit number) presented in order of appearance.

Any of four symbols may appear immediately before the entry of serials. Their meaning is as follows:

★ Journals starred are new. They have been added for abstracting as of the current SA volume.

● Journals with a black circle indicate that they ceased publication. Wherever possible the date of cessation is indicated.

▼ Journals with an inverted triangle indicate that the journal is no longer abstracted.

◆ Journals with a diamond indicate that the publisher of the journal and SA, inc. have agreed to provide to all requesting them, copies of original documents (abstracts of which appeared in SA) under the conditions specified by the copyright law. See p. 2046 for conditions of our **Reproduction Service**.

CUMULATIVE INDEX OF AUTHORS OF BOOKS REVIEWED

This index was created to separate authors of books that are reviewed from authors of articles/papers abstracted and from authors of book reviews.

When the book review citation in the serial in which the review appeared indicates that the author edited the book, the designation [Ed] is appended to his/her name in the index. In all other instances, it is safe to assume that the book was authored by a single individual.

ERRATUM

For reasons known only to itself, the computer that typeset the author index for Volume 28, No 5, dropped about 600 author names. The bound index of that issue is printed on pages 1520 - 1523. A correct index is available to replace the incomplete one. The correct index has 6 pages and begins with page 1520 and ends with page 1523B. We regret any inconvenience this may have caused our users.

ACKNOWLEDGEMENT

Special thanks are due to the hundreds of scholars, professional sociologists, and student volunteers who have prepared abstracts of their own or of their colleagues' publications and submitted them for inclusion in SA. We wish to thank the Program Chairpeople and association Executive Officers for their aid and cooperation in the preparation of *Supplements*, which are produced on very short notice. We also wish to thank our staff who work in, around, and with the whims of our computer; but who nevertheless produce the final product. We wish also to mention Mrs. Agnes Wise of The Science Press who has given great attention and expertise in the speedy production and shipping of the association *Supplements* for distribution at regional, national, and international conventions.

Our appreciation goes to the publishers who send us their journals gratis, and to the many editors who prevail upon their authors to supply us with detailed/informative abstracts of their articles.

And to our users, we wish to say

MAY THE SOURCE CONTINUE TO BE WITH YOU!

Reproduction Service

The costs of reproduction are: US$0.20 per reproduced page. Orders must be prepaid (unprepaid orders cannot be acknowledged or returned) and sent to LANGUAGE and LANGUAGE BEHAVIOR ABSTRACTS, INC. (P.O.Box 22206, San Diego, Ca 92122, USA) together with the LLBA serial acquisitions number and the complete citation of the document to be reproduced. To calculate price per document, multiply the number of pages as indicated in the citation of the abstract by US$0.20 and add a US $1.00 search and postage fee per document. Conference papers are available only when the following notation precedes the text of the abstract: "Complete paper available from LLBA Reproduction Service prepaid at $0.20 per page plus $1.00 search and postage. Length: pp." For copies of papers without this notation, write directly to the author, whose address is listed in the citation.
